

VAISHNO

Megamovers LLP

www.vaishnomm.com

Vaishno Mega Movers (VMM), Mumbai is a leading logistics provider reaching more than 90 countries and seven continents. VMM, a 4PL multimodal operator offers end to end solution for its customers including freight management and warehouse & distribution solutions. With more than 15 years of experience in successfully handling logistics, VMM has established itself as one of the largest logistics and shipping companies in India today. The company has its operating offices in different countries and with its strong global presence; it has a good reach across a wide spectrum of customers and also local knowledge of the country. We have our branch offices in New York, Rotterdam & Dubai, fully owned by Vaishno Megamovers LLP. The company also has its own Inland Container Depot, Vaishno Container Terminal at Tarapur, Maharashtra. VMM strives to deliver service of high standards by focusing on quality, safety, flexibility and reliability. Every service being provided by VMM is backed up by a powerful commitment to quality and world class service. Having crossed many an ocean and many a seas, VMM is certainly a company to reckon with for all your freight forwarding and logistics requirements. VMM today is one of the leading integrated freight forwarding solutions provider in India with substantial years of experience.

Our extensive knowledge of customs regulations and international import/export restrictions help us provide the right solutions to our customers. We always identify and suggest the right solution to transport your consignments to any part of the world, no matter how remote it is. Taking into account the customers' viewpoint, VMM always proposes solutions for more efficient transportation to optimize their entire logistics process. VMM has always adapted itself to the latest trends in the industry to offer efficient and most feasible solutions to its clients and associates. A plush looking Corporate Headquarter in Mumbai and the state-of-the-art Inland Container Depot at Tarapur and CFS at Nhava Sheva port bear witness to the growth of the Group that began on a very humble note.

Vision –

To be counted amongst the most respected and preferred enterprises in the logistics industry globally

Mission –

- To provide one stop shop in logistics
- Up-gradation and adoption of latest technology and solutions
- Delivering operational excellence
- Continual growth through prompt customer service, innovation, quality and commitment

Values – Values are the bedrock of any organization. They are the foundations on which the organization is built. These values govern the individual and corporate behaviour that will take the organization from where it is now, to achieving the mission while living the vision outlined. Values are the standards that help us identify the culture that we wish to establish and guide our conduct in a variety of settings. An organization's values might be thought of as a moral compass for its business practices. While circumstances may change, ideally values do not. Vision and mission statements provide direction, focus, and energy to accomplish shared goals. Values express the integrity that individuals and organizations believe in. They serve as a decision-making tool in daily interactions that guide behaviour. The following values represent how Vaishno Mega Movers choose to operate. They are the keys to our success and need to be maintained at every level and in every aspect. Core values are what support our vision, shape the culture and reflect what the company aspires to achieve. They are the essence of the company's identity – the principles, beliefs or philosophy of values.

1. Timelines
2. Efficiency
3. Cost Effectiveness
4. Flexibility
5. Reliability
6. Convenience to our clients

Door to Door delivery – This is the most convenient way of shipping wherein the shipper is free from all the worries like arranging a container, documentation, warehousing, transportation etc. At Vaishno Mega Movers, we execute the entire process from end to end. The process begins with collection of goods and finalization of the type of container required, whether it will be FCL or LCL. Then it leads to container loading, delivery to the port, Documentation, custom clearance, storage, dispatch as per the schedule and arriving at destination. One of the most important parts in the process is storage, consolidation and inland transportation of your cargo and VMM takes care of this entire gamut of operations. We also help you in getting your container custom cleared at the destination and then get it delivered to its designated address.

Warehousing – Vaishno Mega Movers provides completely secured warehousing services to its clients and partners. The company has its inland container depot strategically located at Tarapur to cater to the needs of the large base of manufacturers and exporters in Tarapur as well as nearby industrial townships like Vapi, Daman, Silvassa etc. Most of our warehousing customers have developed long term and mutually beneficial relationship with our company.

Custom clearance – Having expertise in handling shipments across more than 90 countries for past two decades have made us fully prepared to understand the stringent regulations of the customs department. We use our decades of experience to understand the diverse Customs regulations – which means that your consignments are cleared quickly and efficiently and hassle free. Many a times our goods are stuck at the port for weeks and in some cases even for months due to the non-compliance of the custom rules and regulations. But with a partner like VMM, you can rest assured and your material will reach its destination well in time. The company provides on-site custom clearance facilities for its customers in order to ease off the burden from the shoulders of its clients.

Our Services

Air Freight – In order to meet your freight deadlines, you need a logistics partner with high performance standards and the flexibility to meet your changing needs. With our adequate and trained manpower VMM offers comprehensive portfolio of guaranteed and cost-saving logistics solutions. VMM can meet your air freight requirements with confidence and reliability to provide global coverage with more possibilities than ever before.

Consolidation - The term Consolidation is common in a shipping and freight forwarding industry. Consolidation is a process wherein different consignments for different importers are consolidated in to one consignment and then delivering each cargo as per the agreed terms and condition. Consolidation also takes place for export cargo. Here different consignments from different companies meant for same destination are consolidated into one and then shipped to the particular destinations. Our years of experience and expertise have allowed us to nurture relationships with almost any mode of transportation to flow your goods smoothly through the supply chain. We provide visibility through the entire process by tracking their shipments and inventory we have on hand in our facilities.

Ocean Freight

FCL, also known as Full Container Load in the international shipping industry, normally refers to a 20 feet container. This term is commonly used to describe an international sea freight service where an exporter or importer has exclusive use of a dedicated sea freight container. Sea freight containers are usually loaded and sealed at origin and then shipped by a combination of sea, rail and road to the final destination.

LCL – If an exporter or importer does not have enough goods for one full container then we call it Less Than Container Load. In this case the customer approaches a consolidator, who then combines it with other consignments and then send it through sea freight. In this arrangement, the freight forwarder books a full container with a main shipping company. Then the consignments of different companies are consolidated and loaded on one container to make it Full Container Load.

Our Reach

VMM operates out of all major ports and airports in India. We are particularly strong in USA / EUROPE to India sector where we ship thousands of containers every year. We serve customers across India and handle multiple types of cargo. We have our own offices in New York, Rotterdam and Dubai.
